How hard can it be?

A new idea beckons,
a great improvement.
Just like before.
How hard can it be?

The circuit takes shape,
the first one is made.
Just like before.
How hard can it be?

Then comes the test,
when flaws appear.
Just like before.
How hard can it be?

The days speed by,
the hours are long.
Just like before.
How hard can it be?

The flaws are found.
One at a time.
Just like before.
How hard can it be?

The last test is passed.
Finally, success!
That's when we know,
how hard it can be.
